# Grounding and the 2005 National Electrical Code

## Program Summary:

Grounding and Bonding of electrical systems, sensitive electronic, and communications equipment is the most important and least understood activity in the electrical, data processing and communications industry. Mike will explain the topics of Grounding Fundamentals, System Grounding, and Grounding of Sensitive Electronics and Communications Equipment in an informal and relaxed style using PowerPoint 4-color graphics and examples that apply to today's electrical installations. Those attending this high-energy program will learn the basics as well as the advance concepts necessary to understand the practical grounding and bonding rules in the NEC for systems not over 600V.

Attendees will receive a Certificate of Completion for use in documenting continuing education.

## Speaker: Mike Holt, Mike Holt Enterprises, Inc.

Mike worked his way up through the electrical trade from an apprentice electrician to a master electrician and electrical inspector. Realizing that success depends on one's education, Mike later attended the University of Miami's Graduate School for a Masters in Business Administration (MBA). His own educational experience allows him to understand the needs of his students, whom he strongly encourages and motivates to continue their own education. As an Educator, Mike is nationally recognized as one of America's most knowledgeable electrical trainers and has touched the lives of many thousands of electricians, inspectors, contractors and engineers. His dynamic and animated teaching style is relaxed, direct and fun. The quality that sets Mike apart from the others is his ability to motivate his students to become successful. As a Code Expert, Mike has devoted his career to studying and understanding the National Electrical Code,<sup>®</sup> the foundation of the electrical industry. Researching the NEC all these years and understanding its background has not only made Mike an expert, but it has earned him the respect of his peers. As an Author, Mike is a well-respected author and developer of software, books and video training programs. He has mastered the art of explaining the complicated in a simple but direct style. His ability to simplify technical concepts makes him one of America's most sought after speaker and writer in the electrical trade. His extensive use of illustration in all of his training programs makes learning fun. His articles have been seen in numerous magazines, such as Electrical Construction & Maintenance (EC&M), CEE News, Electrical Design and Installation (EDI), Electrical Contractor (EC), International Association of Electrical Inspectors (IAEI News), The Electrical Distributor (TED) and Power Quality (PQ) Magazine.
