Power Quality Fundamentals

Program Description:

The program will cover the fundamentals of power quality including the following key concepts:

- *What is power quality and the difference between quality and reliability.*
- *What has changed and has not.*
- *The perspective of users and suppliers.*
 - *End user*
 - *Building/facility*
 - *Utility*
- *Monitoring and measuring power quality.*
- *Case studies and other examples of power quality fundamentals.*

Speaker: Mr. Bruce Lonie, PowerCET Corp.

Bruce Lonie is President and a co-founder (1986) of PowerCET Corporation. Previously, he was vice president of ONEAC Corporation (power conditioning equipment manufacturer) and product support manager for the Telecommunications Division of ROLM Corporation. He spent 17-years with GTE Service Corporation, telephone operations, which included operations, customer support, product development and engineering management positions. A recognized expert in the evaluation of equipment/system power and grounding problems, and interference problems for the data and telecommunications industries, Bruce co-authored *The Dranetz Field Handbook for Power Quality Analysis* and has published numerous articles on power quality and the electromagnetic environment. He is a graduate of the University of Redlands, a member of IEEE and NFPA. In addition to working full time at PowerCET, Bruce is active in the United States Tennis Association (USTA) both as a player and a certified sectional referee/umpire and is an avid snow skier. Bruce and his wife, Mitsy, along with three cats reside in Sunnyvale, CA.
