Power Quality Monitoring and Case Studies

Program Description:

1. *Mr. Bridgers will present a complete explanation of Power Quality Monitoring including:*
2. *Introduction to Monitoring and Power Quality Metering equipment*
3. *What are we measuring and how to best meter it*
4. *Transducer considerations including current transformers and potential transformers*
5. *Introduction to Energy, Demand, Power Factor, Power(Real-Apparent – Reactive)*
6. *Introduction to Power Quality and how to identify Power Quality Events*
7. *How to conduct a power quality survey*
8. *Case Studies and Q&A*

Speaker: Thurman Bridgers, Dranetz Technologies, Inc.

Mr. Thurman Bridgers has over 36 years' experience in the Power quality field. His blend of theoretical and practical experience provides an excellent basis for teaching Power Quality seminars and the use of power monitoring equipment. Thurman is currently The Power Monitoring Systems Specialist at Dranetz. Prior positions were: Regional Sales Manager, Applications Engineer and were a Senior Technical Support Engineer where he assisted users in the Setup of monitoring equipment, conducting PQ audits/surveys, and consultation to help solve power quality problems.

Thurman has taught many power quality seminars including past DVPQG General Meeting and is also one of the technical speakers for Dranetz's power quality seminar series that are held annually every spring and fall.
